

INTRODUCING

Mentor*Path*

An AI-powered career companion that gives young people the direction, skills, and confidence to discover what they're meant for.

AI MENTOR

CAREER EXPLORER

LEARNING JOURNEY

THE PROBLEM

Kids take assessments.
Adults give advice.
Nobody shows them the path.

Guidance counselors are overwhelmed. Career tests say "you'd be a good architect" but don't answer "what does that actually look like?" or "what do I do tomorrow?" By the time most people figure it out, they've already pivoted three times.

THE SOLUTION

A mentor that *lives with you* for years, not minutes

MentorPath is a virtual guidance counselor and mentor —
powered by AI — that knows your goals, your interests,
what you hate, and where you are in life. It doesn't teach.
It gives direction.

NOT A SCHOOL

NOT A TEST

A COMPANION

Three ways to find *your path*

01

AI Mentor

Chat with a warm, honest mentor who knows your profile. Ask anything: "What careers match me?" or "I'm scared of blood — can I still be a doctor?" It guides, it doesn't lecture.

02

Career Explorer

Browse real careers and see what the day-to-day actually looks like — salary, timeline, skills, and a "day in the life" snapshot. Virtual shadowing, zero awkwardness.

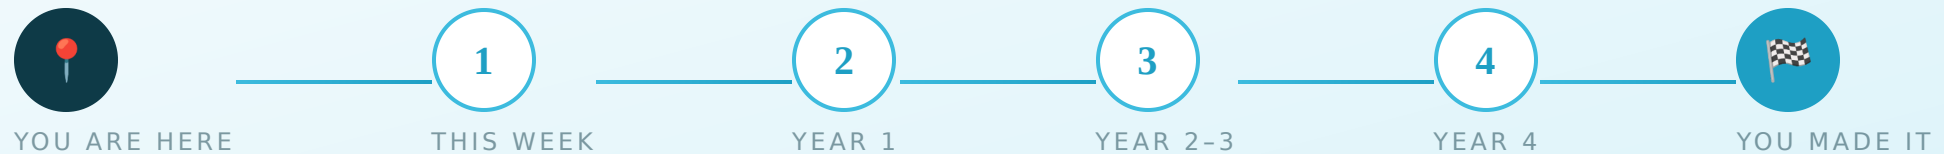

03

Journey Map

Pick a destination and your mentor maps every step from today to arrival — with milestones you check off, concrete actions, skills gained, and fun activities along the way.

INTERACTIVE TIMELINE

From *here* to *there* — every step visible

Each milestone expands into concrete actions, skills gained, and a fun factor — because growth should include play. Check them off as you go. The path updates as your goals evolve.

WHO IT'S FOR

Every age. *Every pivot.*

Students (11–18)

- The 7th grader who thinks they want to be a football player but hasn't considered the odds
- or the music scholarship that's 10× more achievable
- The high schooler choosing between ten possible lives with zero real information
- Any young person who needs a mentor but doesn't have one

Adults in Transition

- The data scientist wondering if their field will exist in 3 years
- The 50-year-old who wants to pivot but doesn't know the options
- Anyone who went to school for one thing and ended up doing another — and wants help with the next move

WHY MENTORPATH

Direction, not just information

80/20

Growth and play.
Hard skills with fun baked in.

10×

Compare multiple paths.
See where they overlap.

24/7

Always available.
No appointment needed.

Unlike career tests that hand you a label and walk away, MentorPath stays. It narrows broad dreams into specific paths, shows you the real day-to-day, and walks beside you as your goals evolve over months and years.

THE VISION

Start virtual. *End with real people.*

Phase one: AI mentors that give personalized, always-available direction.

Phase two: once a student knows what they want, connect them with real mentors in their community to shadow, learn, and grow. The AI gets them ready. The humans get them there.

AI MENTOR → REAL MENTOR

VIRTUAL SHADOWING → REAL SHADOWING

LET'S BUILD THE FUTURE

Every kid deserves a *mentor*.

There aren't enough guidance counselors. There aren't enough mentors. But there can be one in every pocket — one that grows with you, knows you, and never stops showing you what's possible.
